TABLE OF CONTENTS

1 PROJECT ABSTRACT

Create a Java program that uses comparison operators (==, !=, <, >, <=, >=) to compare two variables and print the results.

2 ASSESSMENT TASKS

1. Declare two variables (both int).
2. Compare the variables using comparison operators.
3. Print the results of the comparisons (true/false).

3 TEMPLATE CODE STRUCTURE

3.1 PACKAGE: COM.YAKSHA.ASSIGNMENT.COMPARISONOPERATORSASSIGNMENT
Resources

Class/Interface	Description	Status
ComparisonOperatorsAssignment (class)	• Main class containing the logic to perform and demonstrate comparison operators (==, ! =, >, <, >=, <=).	Need to be implemented.

4 EXECUTION STEPS TO FOLLOW

1. All actions like build, compile, running application, running test cases will be through Command Terminal.

2. To open the command terminal the test takers, need to go to Application menu (Three horizontal lines at left top) Terminal New Terminal.

3. This editor Auto Saves the code.

4. If you want to exit(logout) and continue the coding later anytime (using Save & Exit option on Assessment Landing Page) then you need to use CTRL+Shift+B-command compulsorily on code IDE. This will push or save the updated contents in the internal git/repository. Else the code will not be available in the next login.

5. These are time bound assessments the timer would stop if you logout and while logging in back using the same credentials the timer would resume from the same time it was stopped from the previous logout.

6. To run your project use command:
   mvn compile exec:java

   -Dexec.mainClass="com.yaksha.assignment.ComparisonOperatorsAssignment"

7. To test your project test cases, use the command
   mvn test

8. You need to use CTRL+Shift+B - command compulsorily on code IDE, before final submission as well. This will push or save the updated contents in the internal git/repository, and will be used to evaluate the code quality.
